## POLITICAL READJUSTMENT PLANS

Beverly, Mass., Aug. 12.—Certain events of today, following incidents of the past week or so, lead inevitably to the conclusion that a complete polifical readjustment in circles close to President Taft is in progress.

Representative McKiniey of Illinois, a close friend of Cannon and chairman of the republican congressional campaign committee, was asked here the chief executive had fallshed his morning meet. He talked with the president thirty-five minutes. He found that Mr. Taft had not had an opportupity to read the senator's reply to Senator Bristow's charges regarding the rubber tariff. The president was gratified, however, that Senator Aldrich had consented to make a statemer. In doing so, it is said that the senator from Rhode Island performed an het which fitted exactly into a programme which has been framed by party leaders close to the president. Although he is not to retire until March 4, 1211, and Senator Aldrich confirmed to President Taft today his intention to do so the readjustment plans which plainly are in progress apparently treat whatever influence Mr. Aldrich may have had with the president as a thing of the past.

## THE MEN WHO SELL GOODS.

The man who sells goods and the man who buys them are closely related—they are to a dzgree dependent upon one another; the retailer must sell his goods to make a living, the consummer must buy his goods to live.

The consumer is willing to be convinced, but the retailer must prove his case. Take an arbitrary stand, and let it be widely known that you sell only the best goods, and you are bound to attract the attention of and convince the consumers that you are worthy of their custom. Price is, of course, important, but savice and satisfaction are the first considerations. You can win the regard of a greater number of people by selling good rather than cheap merchandise.

A following of pleased and steady customers who know that whatever they buy from you is the best their money can buy will mean bester and bigger profits to you than all the sales of cheap and underpriced goods you could hold.

Let it be known that your prices are based on absolute values, but talk service and guarantee satisfaction to all of the people all of the time, and make good every word you say. You will win your customers, never fear, because the people do not want cheap goods.

The maximum of that scale was \$2.60 for the sixth year and thereafter. The scale as adopted by the arbitrators gives the men \$2.67 1-2.
